JOHN DO

Senior SDET

AI-Driven Test Automation | Playwright | LLM Agents

SCAN ME

I'm a Senior SDET with 9 years in QA, the last 5+ in fintech and banking, and I love making QA smarter with AI. At Prezzee, I built a QA harness for our **AI-Driven Development Life Cycle (AIDLC)**, where AI agents help design, write and run tests while people stay in control. **Available to work AU and EU hours.**

9 years
QA and test automation, 5+ in fintech and banking

2 AI tracks
AI-assisted QA and LLM chatbot evaluation

4
automation frameworks built from scratch

CAREER

11/2025 - Present 1y+
Prezzee | Senior SDET

4/2022 - 10/2025 3y 7m
Banqup | Senior Automation QA

3/2021 - 3/2022 1y 1m
NAB | Senior Automation QA

7/2017 - 2/2021 3y 8m
FPT Software | QA Engineer

SKILLS

AI in Testing
Claude Code · Codex · GenAI · RAG · MCP connectors · LLM-as-a-judge · LLM agents · Agent skills · LLM evaluation · Human-in-the-loop · promptfoo

Test Automation
Playwright · TypeScript · JavaScript · Jest · Cypress · BrowserStack · Python

API & Performance
REST · GraphQL · Swagger · Postman · XML/XSD · Kafka · k6

CI/CD & Cloud
GitHub Actions · Jenkins · Bitbucket · AWS · GCP · Docker

Data & Observability
SQL · PostgreSQL · Datadog · Splunk

Test Management
Xray · TestRail · Qase

EXPERIENCE

Current role

Prezzee Fintech | Digital gifting and payments — **11/2025 - Present**
Senior SDET — 1+ year
Sole QA engineer for Business Applications. Led QA's move to AI-driven development.

~50%	70%+	80%+	30%	20+
less test design and authoring time	less manual regression	regression coverage	faster response time	features signed off

AIDLC QA HARNESS | END-TO-END AI WORKFLOW — Claude Code + Codex

1. **Requirements** — Read Jira tickets and AC, flag gaps
2. **Test design** — Test plans and cases in Xray
3. **Automation** — Generate Playwright + TS tests
4. **Execution** — Run locally and in GitHub Actions
5. **Triage** — Analyse failures, draft Jira bugs

Connectors (MCP + CLI)
Atlassian MCP · Playwright MCP · GitHub CLI · Xray API · Figma MCP · Datadog MCP · Slack MCP

Agent skills and outputs
Prompt templates · Test plans · Xray test cases · Jira bug drafts · Evidence reports · AI diagrams

Quality gates: Reviewer agent ▸ Human approval ▸ CI: lint, types, tests ▸ Merge

AI-driven QA (AIDLC harness)

- **Built the AIDLC QA harness** where AI agents (Claude Code, Codex) take a Jira ticket to tested, reported code, cutting test design and authoring time by ~50%.
- **Reusable agent skills, prompts and MCP connectors** keep AI output consistent and grounded in real tickets, code and the running app.
- **Quality gates for AI output:** reviewer agent, human approval and CI checks before merge, with evidence reports for sign-off.

Test automation and ownership

- **Playwright + TypeScript frameworks** built from scratch for 2 projects, cutting manual regression by over 70%.
- **E2E, API (REST, GraphQL, Swagger) and integration suites** at 80%+ regression coverage, run on every pull request in GitHub Actions.
- **k6 performance tests** found bottlenecks whose fixes cut response time by 30%.
- **Test strategy and release sign-off** for 20+ features, 20+ logic gaps caught early.

EXPERIENCE

Earlier roles

Banqup — Fintech | E-invoicing and payments

Senior Automation QA

4/2022 - 10/2025
3 years 7 months

Technical lead for 6 QA engineers across 3 teams in the department.

~60%	~90%	40+	25%	15+
less manual testing	regression coverage	features tested	faster response	logic gaps caught

- **AI chatbot testing:** built promptfoo evaluation suites for the in-app GenAI chatbot (RAG), with LLM-as-a-judge checks for answer accuracy, hallucinations and regressions after prompt and model changes.
- **Test automation frameworks:** designed and built Playwright frameworks in JavaScript for 2 greenfield projects, cutting manual testing effort by about 60%.
- **API testing:** automated REST API suites with Playwright for microservices, including JSON and XML/XSD schema validation of e-invoice documents.
- **Test strategy and coverage:** owned test planning and execution for 40+ features across microservices and frontend modules, about 90% regression coverage.
- **Performance testing:** k6 load tests found bottlenecks whose fixes cut average response time by 25%.
- **Shift-left and test data:** caught 15+ logic gaps in requirement reviews with cross-functional teams, and managed test data in TEST and UAT with SQL.
- **CI/CD:** integrated automated regression into Jenkins pipelines so every build was tested before release.

promptfoo · LLM evaluation · Playwright · JavaScript · REST API · XML/XSD · k6 · Jenkins · Postman · Swagger · BrowserStack · Qase · PostgreSQL · AWS · GCP · Datadog · Splunk · Bitbucket

National Australia Bank — Banking

Senior Automation QA

3/2021 - 3/2022
1 year 1 month

- **API test strategy:** reviewed requirements and solution designs with the Australia-based product team, and defined API test automation strategies for 10+ major features.
- **API test automation with Cypress and Jest** to validate service-to-service communication and data flow across microservices.
- **Contract and response checks** for REST and GraphQL APIs and Kafka events, with SQL assertions on PostgreSQL data.
- **Test plans and coverage:** wrote and reviewed feature test plans with the test lead, and tracked automated coverage in TestRail.

Cypress · Jest · GraphQL · Kafka · Postman · Swagger · TestRail · PostgreSQL

FPT Software — E-commerce, CRM

QA Engineer

7/2017 - 2/2021
3 years 8 months

- **E2E automation with Java, TestNG and Selenium WebDriver.**
- **API, smoke, sanity, functional and regression tests** for e-commerce and CRM releases.

Java · TestNG · Selenium · Postman · Swagger

EDUCATION

2014 - 2018
Ho Chi Minh City University of Technology and Education
Engineer's Degree in Industrial Electronics

SOFT SKILLS

Self-study · Communication · Work under pressure · Problem solving · Adaptability · Time management · Critical thinking · Mentoring · Conflict resolution · Leadership · Teamwork · Agile/Scrum

MOTTO “The important thing is not to stop questioning. Curiosity has its own reason for existing.” – Albert Einstein
